EXAMINER

LUGO, CARLOS

ART UNIT	PAPER NUMBER
----------	--------------

3676

DATE MAILED: 08/18/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Interview Summary	Application No.	Applicant(s)	
	10/811,064	GILL, DAVID B.	
	Examiner	Art Unit	
	Carlos Lugo	3676	

All participants (applicant, applicant's representative, PTO personnel):

(1) Carlos Lugo. (3) _____.

(2) Paul Nykasa. (4) _____.

Date of Interview: 08 August 2006.

Type: a) ☒ Telephonic b) ☐ Video Conference
c) ☐ Personal [copy given to: 1) ☐ applicant 2) ☐ applicant's representative]

Exhibit shown or demonstration conducted: d) ☐ Yes e) ☒ No.
If Yes, brief description: _____.

Claim(s) discussed: 1.

Identification of prior art discussed: Harvey (US 6450063).

Agreement with respect to the claims f) ☒ was reached. g) ☐ was not reached. h) ☐ N/A.

Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: See Continuation Sheet.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)

THE FORMAL WRITTEN REPLY TO THE LAST OFFICE ACTION MUST INCLUDE THE SUBSTANCE OF THE INTERVIEW. (See MPEP Section 713.04). If a reply to the last Office action has already been filed, APPLICANT IS GIVEN A NON-EXTENDABLE PERIOD OF THE LONGER OF ONE MONTH OR THIRTY DAYS FROM THIS INTERVIEW DATE, OR THE MAILING DATE OF THIS INTERVIEW SUMMARY FORM, WHICHEVER IS LATER, TO FILE A STATEMENT OF THE SUBSTANCE OF THE INTERVIEW. See Summary of Record of Interview requirements on reverse side or on attached sheet.

Examiner Note: You must sign this form unless it is an Attachment to a signed Office action.

 Examiner's signature, if required

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

In a telephone interview with Mr. Nykasa, the applicant's representative, the rejection to the claims in view of Harvey was discussed.

The applicant proposes three amendments to overcome the current rejection to the claims (attached).

The examiner explains that the first and third propose amendment to claim 1 could overcome the current rejection. However, the examiner believe that the propose amendment would not put the application in condition for allowance since a new rejection could be made.

As to the second proposed amendment, after further consideration, the examiner propose some changes so as to read "a leaf spring connected to the handle, leaf spring is positioned between the sidewalls and having the entirely length of the spring confronting the bottom surface of the base and at least a part of the entirely length of the spring confronting the arm". These limitations will overcome the current rejection in view of Harvey, since the entire length of the spring described by Harvey is not confronting the base surface of the handle. Harvey illustrates that only a portion is confronting the base (Figure 2).

Further, the examiner suggest the following language for claim 1 lines 10-12, "wherein the handle is pivotally connected to the arm, the handle pivotable between a closed position wherein the hub is substantially positioned within the cavity, and an open position, wherein a portion of the hub is substantially outboard of the cavity" in order to clarify the invention..

Proposal For Application No. 10/811,064 – Do Not Enter

DRAFT

1. An operator for a rotatable spindle, comprising:

a hub, the hub having a receiver and an arm extending from the receiver, the receiver adapted to connect to the spindle; and

a handle having a base and a pair of sidewalls extending from the base, wherein the base and sidewalls define a cavity, the base having a top surface and a generally opposed bottom surface;

a leaf spring connected to the handle and positioned entirely within the cavity, the leaf spring positioned between the sidewalls and having a surface generally confronting the bottom surface of the base and an opposite surface generally confronting the arm;

wherein the handle is pivotally connected to the arm, the handle pivotable between a closed position wherein a portion of the receiver is positioned within the cavity, and an open position, wherein the receiver is substantially outboard of the cavity.

XX. An operator for a rotatable spindle, comprising:

a hub having a receiver and an arm extending from the receiver, the receiver adapted to connect to the spindle;

a handle having a base and a pair of sidewalls extending from the base, wherein the base and sidewalls define a cavity, the base having a top surface and a generally opposed bottom surface; and

a leaf spring connected to the handle, the leaf spring positioned between the sidewalls and having a surface generally confronting the bottom surface of the base along substantially an entire length of the leaf spring, the leaf spring having an opposite surface generally confronting the arm;

wherein the handle is pivotally connected to the arm, the handle pivotable between a closed position wherein a portion of the receiver is positioned within the cavity, and an open position, wherein the receiver is substantially outboard of the cavity.

XXX. An operator for a rotatable spindle, comprising:

a hub having a receiver and an arm extending generally transverse from the receiver, the arm having a curvilinear end, the receiver adapted to connect to the spindle;

a handle having a base and a pair of sidewalls extending from the base, wherein the base and sidewalls define a cavity, the base having a top surface and a generally opposed bottom surface; and

a leaf spring positioned in the cavity and between the base and the arm, wherein the spring has a generally planar surface generally confronting the bottom surface of the base and an opposite planar surface generally confronting the curvilinear end of the arm;

wherein the handle is pivotally connected to the arm, the handle pivotable between a closed position wherein a portion of the receiver is positioned within the cavity, and an open position, wherein the receiver is substantially outboard of the cavity.
